PROFESSIONAL SUMMARY:

Principal Software Engineer with 7+ years architecting distributed microservices and
Specialized in high-concurrency systems using FastAPI, AsyncIO, and PostgreSQL. Stric

CORE TECHNICAL COMPETENCIES:

- Backend Frameworks: Python 3.12, FastAPI, AsyncIO, SQLAlchemy 2.0, Pydantic v2
- Databases & Storage: PostgreSQL, Redis Cluster, ClickHouse, database partitioning,
- Security & Identity: OAuth2, JWT with RS256, OWASP API Security Top 10, mTLS
- Reliability & Testing: Pytest with 96% coverage, async test suites, GitHub Actions

EXPERIENCE:

Lead Backend Engineer - Fintech Med Tech (2021 - Present)

- Architected high-throughput payment settlement microservices in FastAPI and Python
- Redesigned relational schema and composite indexing in PostgreSQL, reducing query l
- Enforced strict API security, input sanitization, and OAuth2/JWT token verification
- Authored comprehensive automated test suites using Pytest and factory-boy, maintain
